

Moo K. Chung • Medical Science Center #5785, 1300 University Ave. Madison, WI. 53706, USA • Phone: 608-217-2452 • E-Mail: mkchung@wisc.edu • Web: www.stat.wisc.edu/~mchung

October 14, 2016

Postdoctoral positions are available for multimodal twin brain imaging studies involving DTI, MRI and fMRI at the University of Wisconsin-Madison. The postdoctoral fellows will work with Professors Moo K. Chung, Paul J. Rathouz at the University of Wisconsin-Madison, David H. Zald at Vanderbilt University and Benjamin B. Lahey at the University of Chicago. The positions are NIH funded for 2-3 years.

Candidates should have received or expected to receive PhD degree or equivalent in CS, EE, statistics, biomedical imaging or related areas. Previous neuroimaging research experience is a plus. Topics include multimodal brain image analysis, brain network analysis, imaging genetics, topological data analysis, sparse models and shape modeling. The candidates can also propose topics of their own choosing after discussion. To understand the direction of our research in the past, see our publication in <http://www.stat.wisc.edu/~mchung/publications.html>

Please email your CV and representative papers to Dr. Moo K. Chung (mkchung@wisc.edu).
