

Assignment #1 — Due Friday, September 10, 2010, by 4:00 P.M.

Turn in homework to your TA's mailbox using this sheet as the cover page.

Fill in your name and also circle the *lecture section in which you are registered* and circle the *discussion section you expect to attend* to pick up this assignment.

Name:

Lecture 1 (Larget). **311:** Tu 1:00 - 2:15pm **312:** Th 8:00 - 9:15am **313:** We 1:00 - 2:15pm

Lecture 2 (Hanlon). **321:** Tu 1:00 - 2:15pm **322:** We 2:30 - 3:45pm **323:** We 1:00 - 2:15pm

Please answer the following questions.

1. Find a paper in your field which studies a sample involving several (> 3) variables for each observational unit. Provide a citation and the full abstract for this paper.
 2. (Classification of Data). Classify each variable in the data set, using the distinctions: numerical vs. categorical, experimental vs. observational, and response vs. explanatory.
 3. (Populations and Samples). What is the target population in this study? Repeat a quote from the article which implies the scope of inference to support your response. Describe how the sample is collected. Is the sample collected a random sample? Why or why not?
